

Wellness Within Your Walls is the missing link to reducing toxins in the interior living environment. Harmful toxins are found in products used in building, furnishing, decorating and maintaining our interior spaces. With improved energy efficiency, our homes and buildings have become tighter boxes, allowing these toxins to become trapped inside. By discovering and promoting products that combat this Tight Box Syndrome, our Preferred Vendor Program directly fulfills our mission of connecting global families with healthy eco-sensitive products that result in beautiful, sustainable non-toxic environments.

ALIGN WITH THE WELLNESS WITHIN YOUR WALLS TEAM BY BECOMING A PREFERRED VENDOR.

- Gain substantial market share through the promotion of your WWYW preferred products.
- Receive recognition for your wellness stewardship through the WWYW website and multiple media and sponsorship opportunities.
- Engage in a global dialogue that connects your company with like-minded people.
- Increase profits by becoming more competitive in the market.

WWYW Preferred Vendors and their approved products must be committed to achieving accountability and transparency.
